

Professional Manpower

HEALTH AND SAFTY

The CEO or Chairman of the company, who is actively involved in the company's health and safety affairs and demonstrates senior management's commitment to these issues, receives direct reports from the head of the department. In an effort to fulfill the company's stated mission, a QHSE policy has been created and working in line with the policy statements. The safety officers or supervisors have a strong academic background and a considerable amount of expertise in the field of health and safety to meet the client's requirements to become a safety personal at their jurisdiction. Additional accolades for their resume include KNPC, KOC, and KIPIC approvals, which serve as a testament to their diligence, expertise, and understanding in their respective fields. In addition to routine site activities, the following are the responsibilities that are expected of them

Developing QHSE policies.

Developing HSE management System & QHSE manual

Development of Project HSE plan.

Development of Method statements and ITP's .

Development of project Quality Plan .
