

TOPOGRAPHIC SURVEY AND MAPPING

Using the latest geomatic technology including reflector less theodolites robotic instruments, survey quality GPS and one-man total stations we provide our clients and their consultants with accurate and economical survey solutions for all aspects of land surveying. Our software can produce data in any format, including AutoCAD, for all measured land survey types including 3D digital terrain models, DTM, volume or area calculations, sections, and setting-out schedules. Our land survey services are provided throughout the Kuwait and gulf region. Whether you require assistance with topographical, engineering, boundaries, or GPS survey we have Survey Solutions.
